R.E.A.C.H., Inc.
Comprehensive Mental Health Clinic

REACH Profile

R.E.A.C.H., Inc. is a state-certified alcohol and other drug abuse and outpatient mental health clinic.

Our treatment staff is comprised of highly trained professionals who represent many years of cumulative experience in mental health as well as counseling in the field of alcohol and other drug abuse. Our staff represents a healthy balance of gender representation, ethnic backgrounds, cultural heritage and religious traditions.

Conveniently situated in Brown Deer, REACH Clinic is located at 4550 W Bradley Road, Brown Deer, WI 53223. The clinic’s phone number is 414-371-1600. The facility is centrally located near public transportation, major bus lines and is easily accessible. Off-street parking is also available.

The most applicable client data accumulated between 1991 and the present indicates that African Americans and Hispanics in Milwaukee predominately reside in numerous aldermanic districts which encompass the Northeast and Southeast areas of the city. These areas lie within the 53204-53210 and 53212 zip codes, which are considered to have the highest concentration of unemployment, poverty, and lack of education. These key areas also have been found to have more children in them than other areas of the city and have the highest number of female-headed households.

As required during the course of or at the end of a patient’s treatment for vocational training or for further support or rehabilitation, REACH refers clients to agencies such as the Division of Vocational Rehabilitation, Curative Workshop, Goodwill Industries and the Grand Avenue Club. We also utilize community resources such as group homes and residential treatment centers when a patient’s needs warrant the inclusion of such services in their treatment plan.

As a result of the concerted effort in working with the Department of Social Services, HMO’s, PPO’s, and EAP’s, REACH has been able to provide services to a high volume of children, adolescents and adults. We also have worked quite closely with the court system in providing services to individuals who have been referred after encountering legal problems.

The REACH Clinic staff is available to assist people in need of help. If for any reason the program is not suitable for a given client, referrals will be made to other agencies to meet a particular need.
WHEN TO SEEK PROFESSIONAL COUNSELING

There are times when individuals and families may need professional help in coping with recovering from illness, loss or stressful periods. Counseling is advised before situations reach a crisis. The Clinic’s doctors and therapists confront problems with individualized, practical, balanced solutions. Individuals dealing with one or more of the following issues may benefit from professional counseling:

- Depression and anxiety
- Marital Conflicts
- Anger and bitterness
- Alcohol and chemical dependency
- Grief and loneliness
- Communication problems
- Personality disorders
- Premarital counseling
- Psychiatric and biochemical disorders
- Sleeping difficulties or loss of appetite
- Difficulty in building and maintaining satisfying relationships
- Confusion, memory loss, or nervousness
- Obsessive behavior
- Low self-esteem and self-destructive behavior
- Coping with chronic illness or everyday stress
- Impaired thought processes
- Vocational or relocation changes
- Divorce recovery
- Child and adolescent issues
- Stress management and burnout
- Parenting issues
- Behavioral problems
- Learning difficulties
- Eating disorders
- Crisis intervention
- Impulse disorders
- Phobias, paranoia, excessive fear
- Incest or trauma recovery
- Irresponsible or immoral behavior
Addiction Treatment

Your Own Path to Addiction Treatment
Taking the first step toward recovery is oftentimes the most difficult decision one must make. We have an addiction treatment program that is open ended. With our addiction treatment program you can get off to a great start and for the first time have a solid foundation, and have an addiction treatment program that you accept and believe in. Our addiction treatment program offers our clients a chance to find their own path to drug and addiction recovery. You will reap the benefits of this unique and successful approach to addiction treatment.

Addiction Treatment Therapies That You Will Find at REACH Inc:

GOALS

1. Understand the role of society in defining the problem of domestic violence.

2. Define domestic violence and the theoretical perspectives of domestic violence, and the perspectives of the victim, the perpetrator, and the family.

3. Describe the characteristics of domestic violence as well as the characteristics of the perpetrator, including the impact on the survivor of domestic violence.

4. Screen, assess, and plan treatment approaches for the domestic violence victim and the family system.

5. Develop preventative measures via early intervention in multiple contexts.

OBJECTIVES

A 2010 survey by the Centers for Disease Control and Prevention found that 30 percent of women in the country and a quarter of the men have been beaten, pushed or shoved by an intimate partner. "On average, 24 people per minute are victims of rape, physical violence, or stalking by an intimate partner in the United States, based on a survey conducted by the National Intimate Partner and Sexual Violence Survey: A Report to the Nation, 2010. Over the course of a year, there are more than 12 million women and 6 million men who are victims of domestic violence, sexual violence, stalking, and intimate partner violence, which can lead to injuries that require specialized training in working with the complexity of domestic violence."
